

Cost Effective 8 Port SAS RAID Controller for SMB and SOHO Markets

Milpitas, CA – HighPoint Technologies, announces immediate availability of the RocketRAID 2680, the higher port count member added to the RocketRAID 2600 cost effective SAS connectivity plus RAID 5 Controller series.

The RocketRAID 2680 low profile design is perfect for small factor systems and PCI-Express x4 bus connectivity supports fast data transfers. The internal mini-SAS connector offers the robust flexibility to support up to eight 15,000 rpm SAS hard drives for performance and / or eight lower cost SATA hard drives for capacity. The flexibility to support SAS and SATA drives on the same controller provides a true balance of performance and capacity.

HighPoint continues it's impressive track record of meeting customers' needs by delivering the RocketRAID 2600 SAS RAID series that are feature rich and have robust connectivity for internal or external storage that deliver the performance required at an extremely competitive price point.

Model	RocketRAID 2680	RocketRAID 2644X4	RocketRAID 2640X4	RocketRAID 2640X1
Connector Count	2	1	4	4
Hard Disk Support	8 SAS/SATA	4 SAS/SATA	4 SAS/SATA	4 SAS/SATA
PCI Express Lanes	4	4	4	1
RAID Levels	1,5,10,50,JBOD	0,1,5,10,JBOD	0,1,5,10,JBOD	0,1,5,10,JBOD
Connector Type	Internal mini-SAS	External mini-SAS	Internal	Internal
Low profile	Yes	Yes	Yes	Yes
Cables included	Yes	No	Yes	Yes
MSRP	\$299	\$199	\$168	\$139

About HighPoint

HighPoint Technologies, long recognized as a leader in RAID technologies specializes in the design and manufacturer of HBA (Host Bus Adapters) and HighPoint RAID IP (Intellectual Property). HighPoint provides a broad range of scalable hardware HBA's that meet the storage requirements of all customer types from Enterprise to SMB (Small Medium Sized Business) to PC enthusiast.
