

HighPoint Releases RocketRAID Finder –Search Engine for Compatible Apple Macintosh

Milpitas Calif. – HighPoint Technologies, announces the RocketRAID Finder – a 3 step search engine that finds a compatible RocketRAID controller for Apple Macintosh systems. HighPoint is industry leader in providing a comprehensive RAID solution with support for standard enclosure connectivity that is compatible with the entire Macintosh product line from (Power Mac G4, G5, Mac Pro and Xserve) platforms.

Simplifying the Search

The new RocketRAID Finder simplifies the process of searching with an easy three step approach.

The first step is to select the Macintosh system. Every Macintosh system is listed from Power PC to the latest Intel based Mac systems.

The second step is to select the storage type. External storage solutions often present a confusing number of choices. Oftentimes, educating end users with the correct external storage solution is needed to get them up to speed on the various connectivity options.

The third and final step is to click on the Submit button. A compatible RocketRAID controller will be displayed based on the user's first and second choice.

Selecting the Macintosh System and Enclosure Connectivity

The RocketRAID series of controllers are compatible with current standard enclosure connectivity types on the market which includes (Infiniband, eSATA, and Port Multiplier)

Infiniband – Single cable supporting up to 4 hard drives

eSATA – External Serial ATA up to 8 hard drives

Port Multiplier - Single cable supporting up to 5 hard drives

Macintosh System	Enclosure Connectivity	RocketRAID Controller
Power Mac G4	Infiniband, eSATA, Port Multiplier	RocketRAID 2224, 1742,1522
Power Mac G5 (PCI-X)	Infiniband, eSATA, Port Multiplier	RocketRAID 2224, 1742, 1522
Power Mac G5 (Dual)	Infiniband, eSATA, Port Multiplier	RocketRAID 2322, 2522, 2314MB, 2314, 3522
Mac Pro	Infiniband, eSATA, Port Multiplier	RocketRAID 2322, 2522, 2314MB, 2314, 3522
Xserve G5	Infiniband, eSATA, Port Multiplier	RocketRAID 2224, 1742,1522
Xserve Quad Core	Infiniband, eSATA, Port Multiplier	RocketRAID 2322, 2522, 2314MB, 2314, 3522

Every compatible RocketRAID SATA II series controllers for Apple Macintosh are management using is single interface. The HighPoint RAID management web GUI users a web browser to create, monitor and manage storage arrays. This powerful management utility ensures data availability and accessibility with advanced data protection.
