

FOR IMMEDIATE RELEASE

HighPoint Releases RocketRAID 2310 PCI-Express 4 port SATA II RAID Controller for Entry Level Servers, NAS and High Performing Workstations

Milpitas, CA – February 21, 2006 – HighPoint Technologies, Inc. a global leader in providing multi-channel SATA II RAID solutions today announces availability of the RocketRAID 2310 PCI-Express x4 SATA II RAID Controller for entry level servers, NAS and high performing workstations.

The RocketRAID 2310 is specifically designed to target these markets that need high performing and reliable storage RAID solutions. The RocketRAID 2310 represents the next generation in high performance computing by utilizing the latest interconnect technology with PCI-Express to provide faster and improve I/O performance.

The power of the RocketRAID 2310 PCI Express RAID controller will deliver data transfer rates in both directions simultaneously with its serial data transfer system and brings with it higher clock speeds. Each PCI Express expansion slot can have several channels that give plenty of room for expansion and by transferring data rates in both directions performance and scalability will be guaranteed for the next decade.

The RocketRAID 2310 represents another milestone for HighPoint Technologies, in offering high performing and reliable SATA II RAID Solutions with PCI-Express technology and support for the Serial ATA 2.5 specification.

The RocketRAID 2310 offers 4 internal ports that combine high-performance storage connectivity of Serial ATA with HighPoint's advanced RAID features, including support for RAID (0,1,5,10 and JBOD). The RocketRAID 2310 offers 3Gb/s transfer rates for bandwidth intensive applications, NCQ (Native Command Queuing) which increases performance in random workloads, Staggered Drive Spin-Up and SAF-TE chassis management. Other advanced features of the RocketRAID 2310 include Online Capacity Expansion, Online RAID Level Migration (OCE/ORLM), SMART Array monitoring and HighPoint's RAID Management software to monitor and configure RAID arrays.

The RocketRAID 2310 is currently available through HighPoint approved distributors and from online retailers. (<http://www.highpoint-tech.com/USA/sale-map.htm>)

About HighPoint Technologies Inc.

HighPoint Technologies, Inc. is a leader of Ultra DMA/ATA and Serial ATA RAID Controllers for data storage within the PC industry. Since 1995, the company has successfully launched a series of data storage management products and has been recognized as the technology leader in the I/O area. The company's mission is to provide cutting-edge multi-channel SATA RAID solutions.
