

HighPoint Announcing Industry's 1st **SATA 6Gb/s RAID** Capable Host Adapter

HighPoint Technologies - an innovative host-based RAID controller manufacturer is introducing the RocketRAID 620 Series- the industry's first SATA 3.0 host adapters with RAID 5 capability. The 620 series will double the data rate from 3Gb/s to 6Gb/s for high bandwidth PC applications, gaming, digital video and audio, video streaming and graphics applications.

The two members of the RocketRAID 620 Series – RocketRAID 620 (MSRP \$69.99) and RocketRAID 622 (MSRP \$79.99) will ship mid January 2010. These premier RAID host adapters are based on PCI-Express Gen 2 host interface technology and are designed to optimize storage performance and redundancy with RAID 0, 1, 5, 10 and JBOD. User friendly features include **hot plug** and **hot unplug** to add or remove storage devices; and OCE/ORLM to expand storage capacities or migrate to different RAID levels.

High Performance Companion for SATA 6Gb and SSD

The dedicated bandwidth provided by the RocketRAID 620 Series point-to-point connectivity is ideal for SSDs and SATA 6Gb interface storage - each 600MB/s lane is tuned for maximum performance. By supporting backward compatibility to SATA 3Gb/s and 1.5Gb/s interface users can seamlessly migrate their existing SATA cables/connectors and hard disks, to the RocketRAID 620 Series controllers.

Port Multiplier – Cost Performance Ratio

The RocketRAID 620 Series offers the most economical way to optimize performance to capacity ratio by supporting port multiplier devices. Smart fan-connectivity enables drive scalability up to 5 SATA drives through a single 600MB/s eSATA channel.

Smart and Robust RocketRAID Management Suite for Major OSes

The RocketRAID Manage Suite provides a user-friendly web-based management interface to maintain storage devices. It incorporates HighPoint's SHI (Storage Health Inspector) technology to provide active and early-warning features to maintain the integrity of the storage environment. The RocketRAID management suite supports every major operating system including Windows 7, Linux and FreeBSD.

Availability:

The RocketRAID 620 Series are available exclusively through channel distribution partners ([Bell Micro](#), [D and H](#), [MaLabs](#), and [ASI](#)).
